

User Acceptance Testing (UAT) Template

Date	08 September 2026
Team ID	SWUID2026190381
Project Name	Medical Diagnosis Center by Service Portal (ServiceNow)
Maximum Marks	10 Marks

Project Overview:

Project Name: Medical Diagnosis Center by Service Portal (ServiceNow)

Project Description: A ServiceNow-based healthcare application that allows patients to register, book diagnostic tests, track appointments, view laboratory reports, manage payments, and receive automated notifications through a Service Portal.

Project Version: Version 1.0

Testing Period: 31 August2026 to 08 September 2026

Testing Scope:

The following modules were tested during User Acceptance Testing.

Features Tested

- Patient Registration.
- Diagnostic Test Booking.
- Appointment Slot Validation.
- Appointment Approval Workflow.
- Payment Status Tracking.
- Laboratory Report View & Download.
- Email Notifications.
- Role-Based Access (Admin and Patient).

User Stories Tested

- Patient can register successfully.
- Patient can book a diagnostic test.
- System validates available appointment slots.
- Admin approves appointments.
- Patient receives booking confirmation.
- Patient can download completed reports.
- Payment status is updated correctly.

Testing Environment:

Application ServiceNow Developer Instance – Medical Diagnosis Center Service
 Location Portal
 Platform ServiceNow Developer Instance
 Browser Google Chrome
 Test User Role Patient and System Administrator

TestCases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Patient Registration	Open registration page. Enter patient details. Click Register.	Patient account is created successfully.	Registration completed successfully.	Pass
TC-002	Book Diagnostic Test	Select test. Choose date and time slot. Submit booking.	Appointment is created and confirmation is displayed.	Appointment booked successfully.	Pass
TC-003	Time Slot Validation	Select an already booked slot. Try booking again. Admin opens appointment.	System prevents duplicate booking.	Duplicate slot booking was blocked.	Pass
TC-004	Appointment Approval Workflow	Approves request.	Status changes from Requested to Confirmed.	Workflow updated successfully.	Pass
TC-005	Payment Status Validation	Complete payment. Verify payment status.	Payment status becomes Paid..	Payment updated successfully.	Pass

TC-006	View Laboratory Report	Login as patient. Open My Reports page.	Completed reports are visible.	Reports displayed successfully.	Pass
TC-007	Download Report	Open completed report. Click Download.	Report downloads successfully.	Download completed successfully.	Pass
TC-008	Email Notification	Book appointment. Approve appointment.	Patient receives confirmation email.	Email notification triggered successfully.	Pass
TC-009	Role-Based Access	Login as Patient. Login as Admin.	Patient and Admin access only permitted modules.	Role permissions worked correctly.	Pass
TC-010	Mandatory Field Validation	Leave required fields empty. Submit booking.	System displays validation error.	Mandatory Validation worked correctly.	Pass

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	Duplicate appointment booking was allowed.	Select same test, date, and slot twice.	Medium	Closed	Business Rule added to prevent duplicate slots.
BG-002	Payment status was not updated	Complete payment and refresh	Medium	Closed	Payment status field updated

	after confirmation	appointment.			through Flow Designer.
BG-003	Patient could not download completed report.	Open completed report and click Download.	Low	Closed	Report attachment permission was corrected.

Notes:

- All major modules of the Medical Diagnosis Center application were tested successfully.
- Both positive and negative test scenarios were executed.
- Appointment workflow, report generation, payment status, and notifications worked as expected.
- All identified bugs were fixed before final deployment.
- The application successfully passed User Acceptance Testing (UAT) and is ready for deployment.
